rah abrisham hasht behesht

Rah Abrisham Brand is a reputable and well-established name in the field of waterproofing insulation, with over 20 years of experience in this industry. This company, utilizing advanced technology and high-quality materials, produces products with superior performance and adequate durability. The products of Rah Abrisham Brand, due to their high efficiency and unique capabilities, are recognized as an ideal choice for insulating buildings and preventing moisture penetration into structures. As a symbol of trust and quality, Rah Abrisham Brand guarantees the preservation of the health and stability of your structures against damages caused by environmental moisture.

Bitumen Membrane

Bitumen membrane is one of the most widely used products in waterproofing, made from bitumen and synthetic fibers. Rah Abrisham Company produces various types of Bitumen membrane with different characteristics suitable for use on roofs, walls, and foundations.

rah abrisham hasht behesht

Types of Bitumen membrane by Layers

- Single-layer Bitumen membrane: This type of Bitumen membrane is made with a single internal layer of polyester fibers or spunbond fabric, offering higher flexibility due to its single-layer structure.
- Double-layer Bitumen membrane: Made with two internal layers of polyester fibers and glass fibers, this type typically has higher durability and bitumen absorption than single-layer Bitumen membrane.
- Triple-layer Bitumen membrane: This type contains three internal layers of fibers, offering better bitumen absorption and higher quality. It is reinforced with wire rods for added strength and is produced for specific uses, not for general purposes.

Types of Bitumen membrane by Coating

- Foil-coated Bitumen membrane: This type features an aluminum foil layer, used solely to block sunlight without affecting the quality of the Bitumen membrane.
- Simple or Powdered Bitumen membrane: Known as powdered or non-coated Bitumen membrane, where instead of aluminum foil, mineral powder or plastic is used on the surface.
- Patterned Bitumen membrane: This type of Bitumen membrane replaces aluminum foil with patterned foil, offering designs such as brick, grass, ceramic, wood, and more.
- Gravel-coated Bitumen membrane: This type uses natural colored gravel instead of aluminum foil on the surface.

Mineral wool

A type of insulation made from fibers derived from basalt, an igneous rock. Rock wool is used in various industries, including construction, recording studios, cinemas, petrochemical industries, refineries, ovens, boilers, chimneys, air ducts, and many other applications. This product is available in different forms such as raw and bulk, blanket, board, pipe, and quilted types.

rah abrisham hasht behesht

Glass wool

Fiberglass wool is a type of mineral fiber that acts as thermal and acoustic insulation, made from recycled molten glass along with some regular sand and resin. Fiberglass wool is produced in the form of glass wool fibers and consists of relatively short cylindrical fibers. This product comes with three types of covers: foil, black glass cloth, and fabric glass fibers, and is widely used in construction, automotive industries, metal structures, and many other industries as an insulating material.

Elastomeric Insulation

This waterproof insulation is a type of insulating material that replaces polyethylene foam insulation. Elastomeric insulation is produced in different forms for varying applications, making it highly versatile for industrial and construction purposes that require insulation materials. It is used in HVAC, refrigeration, heating, plumbing, tanks, fittings, and air ducts.

rah abrisham hasht behesht

Types of Elastomeric Insulation

- Rolls: This type, available in rolls or blankets, is usually made of elastomer and is used for insulation in various industries and applications.
- Pipe Insulation: This type lacks foil layers and instead uses pure elastomeric materials for thermal insulation.
- Mattress Insulation: This type is produced without any coating, with a thickness of 4 to 5 cm, and is cut into sizes of 1-meter width and 2-meter length. It is mainly used in mattresses and furniture making.
- Self-adhesive Insulation: This type includes rolls or blankets that have one side coated with special adhesive for faster and more efficient insulation work.

Hollow or Silicone Fibers

A type of synthetic fiber widely used in filling furniture, mattresses, and pillows after being processed with special machines. This product, due to its widespread application, is available in two models, plain and spherical, in bulk or custom quantities to meet the needs of customers.

Sandwich Panels

Sandwich panels are structures made of three connected layers: the outer layers are metal sheets like aluminum, Aluzinc, or galvanized steel, and the middle layer is injected foam, usually made of materials like polystyrene, polyurethane, rock wool, or fiberglass. These panels are divided into five categories: simple roof panels, concealed fastener roof panels, Shadoline roof panels, trapezoidal roof panels, and tile roof panels, each with diverse features and capabilities suited for different environments.

Carton plast

Cartonplast is another product of Rah Abrisham Company that, due to its high resistance to moisture and impact, is used for packaging and insulation in various industries.

Rah Abrisham Company's Target Market

In addition to the domestic market, Rah Abrisham Company focuses on exporting its products to neighboring countries. By offering high-quality products with attractive designs, the company aims to attract international customers.

All Rah Abrisham products are produced using the finest raw materials, enhancing their durability and efficiency. This company offers a comprehensive range of insulation products that meet various industrial needs and is constantly updating its technology, utilizing the latest scientific advancements in its production processes. The renowned Rah Abrisham Brand also allows for product customization, enabling customers to receive the product tailored to their specific needs. The experienced team at Rah Abrisham proudly guarantees that every product will be offered with the highest quality at a competitive price.
